- **80%** of all IT budgets will be **committed to cloud solutions** in the next 15 months

Hear It From Our Customers

"With WatchGuard, we were actually able to take the device, without ever having physically touched it, build a configuration, send it to the cloud, send the device to the end user, and they simply connect it and pull down the configuration. We're well under 30 minutes on average per install now."

- Dustin McCreight, Product Manager, NCR

"RapidDeploy saves us a lot of time and expense. Replacing a firewall does not mean that one of us has to hop on a plane and fly halfway around the world. The centralized configuration is ideal for us and has yet to display the slightest weakness."

- René Clausing, Head of IT, IKN GmbH
